

WEEKLY INFLUENZA WATCH WEEK 1: DECEMBER 31 - JANUARY 6, 2024

Week 1 Highlights

The weekly influenza watch summarizes the flu activity in the City of Cleveland. The metrics in this report include the number and percentage of emergency department visits for influenza-like illness, confirmed flu hospitalizations, and deaths each week due to pneumonia or influenza.

- This week, flu activity is classified as "High"
- 2.19% of emergency department visits were for flu-like illness
- There were 55 confirmed cases of influenza-associated hospitalizations reported this week. There have been 161 influenza associated hospitalizations so far this season
- 4.26% of deaths reported were due to pneumonia. One influenza deaths was reported this week and there has been one influenza death so far this season

Flu	Intensity:	Very High
-----	------------	-----------

Influenza & COVID-19 Intensity Indicators	This Week n (%)	Activity Compared to Last Week	Season Total n (%)
Emergency Department visits for Influenza-like Illnesses	92 (2.19%)	-0.37%	1,081 (1.90%)
Confirmed Influenza Hospitalizations	55	-31	216
Confirmed COVID-19 Hospitalizations	14	-10	137
Pneumonia- & Influenza- related Deaths	13 (4.26%)	-0.43%	203(5.05%)

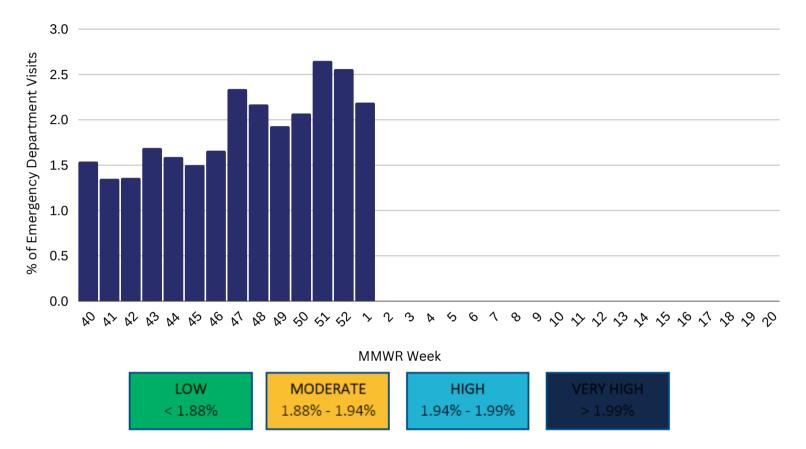

*Deaths represent all deaths for Cuyahoga County. All other data presented are City of Cleveland-specific Data are preliminary and subject to change as more information is gained. The three indicators for calculating the intensity thresholds are based <u>on 2017 methodology from the Centers for Disease</u> <u>Control and Prevention.</u>

Influenza-like Illnesses (ILI)

Percentage of Emergency Department visits for ILI by Week, 2023-2024

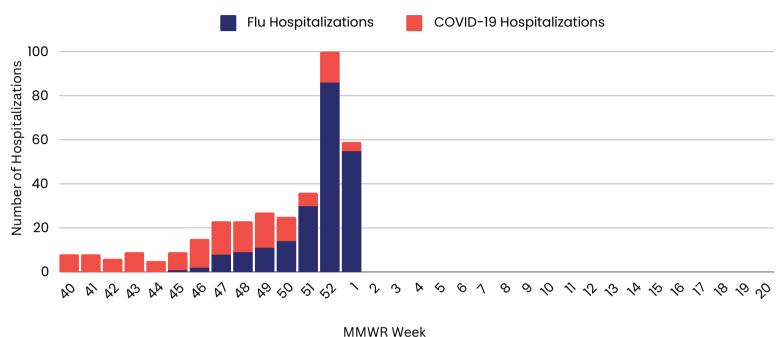

The proportion of Emergency Room visits for influenza-like illnesses is above the very high threshold and comparable to the 5-years average. This week, 45% of the visits were among males. Regarding race and ethnicity, 34% of visits were Black or African American individuals; 19% were among White individuals; and 47% of visits were among other racial groups. A little over than third (40%) of visits were among Hispanic or Latin individuals. The median age this week is 7 years.

*Data Source: Health Monitoring Systems: EpiCenter 3.5.18. Data extracted on 5/21/2024. Low, Moderate, and High intensity thresholds are defined as the 50%, 90%, and 99% Confidence Intervals, respectively, based on the 5-Year Average of previous seasons

Influenza and COVID-19 Hospitalizations

Number of Flu and COVID-19 Hospitalizations by Week, 2023-2024

MINIWR Week

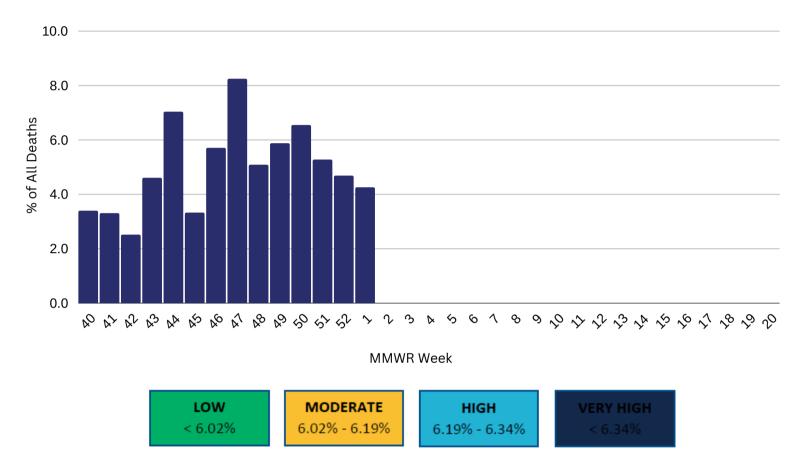

There have been 86 influenza-associated Hospitalizations (IAH) reported this week among individuals aged 5 months to 93 years. Over half of these hospitalizations were among residents 60 years of age and older. This is roughly 50% higher than the number of hospitalizations than expected at this point in the year based on the 5year average. This brings the total influenza-associated hospitalizations for the season to 216. Influenza has accounted for more hospitalizations than COVID-19 this fall. The number of COVID-19 hospitalizations has decreased from the previous week, with 4 hospitalizations reported during this reporting week.

*Data Source: Ohio Department of Health: Ohio Disease Reporting System. Data extracted on 5/21/2024. Data are preliminary and subject to change as more information is gained. Low, Moderate, and High intensity thresholds are defined as the 50%, 90%, and 99% Confidence Intervals, respectively, based on the 5-Year Average of previous seasons.

Pneumonia- & Influenza -Associated Deaths*

Percentage of Deaths due to Pneumonia or Influenza by Week, 2023-2024

There have been 13 deaths this reporting week due to pneumonia or influenzarelated illnesses (P&I). The proportion of P&I deaths is in the low threshold this week. This week, the data shows there was one influenza-associated death, which brings the season total to 3. Also, there have been 11 COVID-19 associated deaths thus far in the same period. The majority P&I deaths that occurred this week were among individuals aged 25 years and older.

*Data Source: Cleveland Department of Public Health Department of Vital Statistics. Data compiled on 5/21/2024. Data are preliminary and subject to change as more information is gained. *Deaths represent all deaths for Cuyahoga County. All other data presented are City of Cleveland-specific. Low, Moderate, and High intensity thresholds are defined as the 50%, 90%, and 99% Confidence Intervals, respectively, based on the 5-Year Average of previous seasons.
