

Week 2 Highlights

The weekly influenza watch summarizes the flu activity in the City of Cleveland. The metrics in this report include the number and percentage of emergency department visits for influenza-like illness, confirmed flu hospitalizations, and deaths each week due to pneumonia or influenza.

- This week, flu activity is classified as “High”
- 1.84% of emergency department visits were for flu-like illness
- There were 53 confirmed cases of influenza-associated hospitalizations reported this week. There have been 269 influenza associated hospitalizations so far this season
- 6.51% of deaths reported were due to pneumonia. Two influenza deaths was reported this week and there has been five influenza deaths so far this season

Flu Intensity: High

| Influenza & COVID-19 Intensity Indicators | This Week n (%) | Activity Compared to Last Week | Season Total n (%) |
|--|-----------------|--------------------------------|--------------------|
| Emergency Department visits for Influenza-like Illnesses | 74 (1.84%) | -0.35% | 1,155 (1.90%) |
| Confirmed Influenza Hospitalizations | 53 | -2 | 269 |
| Confirmed COVID-19 Hospitalizations | 5 | +1 | 142 |
| Pneumonia- & Influenza-related Deaths | 27 (6.51%) | +2.25% | 230 (5.07%) |

**Deaths represent all deaths for Cuyahoga County. All other data presented are City of Cleveland-specific. Data are preliminary and subject to change as more information is gained. The three indicators for calculating the intensity thresholds are based on 2017 methodology from the Centers for Disease Control and Prevention.*

Influenza-like Illnesses (ILI)

Percentage of Emergency Department visits for ILI by Week, 2023-2024

The proportion of Emergency Room visits for influenza-like illnesses is above the very high threshold and higher than the 5-years average. This week, 44% of the visits were among males. Regarding race and ethnicity, 35% of visits were Black or African American individuals; 22% were among White individuals; and 43% of visits were among other racial groups. Nearly half (45%) of visits were among Hispanic or Latin individuals. The median age this week is 6 years.

**Data Source: Health Monitoring Systems: EpiCenter 3.5.18. Data extracted on 5/21/2024. Low, Moderate, and High intensity thresholds are defined as the 50%, 90%, and 99% Confidence Intervals, respectively, based on the 5-Year Average of previous seasons*

Influenza and COVID-19 Hospitalizations

Number of Flu and COVID-19 Hospitalizations by Week, 2023-2024

There have been 53 influenza-associated Hospitalizations (IAH) reported this week among individuals aged 8 months to 90 years. The majority of these hospitalizations were among residents 60 years of age and older. This is roughly 50% higher than the number of hospitalizations than expected at this point in the year based on the 5-year average. This brings the total influenza-associated hospitalizations for the season to 269. Influenza has accounted for more hospitalizations than COVID-19 this fall. The number of COVID-19 hospitalizations has decreased from the previous week, with five hospitalizations reported during this reporting week.

**Data Source: Ohio Department of Health: Ohio Disease Reporting System. Data extracted on 5/21/2024. Data are preliminary and subject to change as more information is gained. Low, Moderate, and High intensity thresholds are defined as the 50%, 90%, and 99% Confidence Intervals, respectively, based on the 5-Year Average of previous seasons.*

Pneumonia- & Influenza -Associated Deaths*

Percentage of Deaths due to Pneumonia or Influenza by Week, 2023-2024

There have been 27 deaths this reporting week due to pneumonia or influenza-related illnesses (P&I). The proportion of P&I deaths is above the high threshold this week. This week, the data shows there was not an influenza or COVID-19-related death, however, there have been five COVID-19-related deaths and one influenza death since the beginning of October. The majority P&I deaths that occurred this week were among individuals aged 45 years and older.

**Data Source: Cleveland Department of Public Health Department of Vital Statistics. Data compiled on 5/21/2024. Data are preliminary and subject to change as more information is gained.*

**Deaths represent all deaths for Cuyahoga County. All other data presented are City of Cleveland-specific.*

Low, Moderate, and High intensity thresholds are defined as the 50%, 90%, and 99% Confidence Intervals, respectively, based on the 5-Year Average of previous seasons.
